Re: Georgetown Overall Transportation Plan Update  
Klotz Associates Project No. 0573.003.001

Dear Mr. Polasek,

Klotz Associates is pleased to provide this final report for the Georgetown Overall Transportation Plan for the City of Georgetown.

This report documents the development of the update to the City's Overall Transportation Plan. Included in this document is an analysis of existing conditions in the study area, as well as an update to the long range travel demand model. Recommended transportation improvement alternatives were developed using parameters such as the travel demand model, City of Georgetown input, goals and objectives as well as current design standards. The recommendations included in this Plan are for both roadway extensions and widening, as well as for construction of new roadways. The Plan also recommends the adoption and implementation of not only the Overall Transportation Plan, but of Sidewalk, Bicycle and Airport Master Plans for the area.

We wish to acknowledge the exceptional cooperation and support provided by City of Georgetown staff during the development of the Overall Transportation Plan Update and appreciate the opportunity to have been involved in the important project. We trust that the Overall Transportation Plan Update will assist the City of Georgetown and your partners in improving mobility throughout the City.

Sincerely,

Zach Ryan, P.E., CFM  
Project Manager
